EXPERIENC

Unum, CT | May 2023 Present

Frontend Developer

- Designing and implementing user-friendly web pages with interactive UI using HTML, CSS, JavaScript, jQuery, JSON, Ajax, and Bootstrap.
- Implementing Agile methodologies with bi-weekly sprints and daily stand-up meetings for efficient application development and timely delivery.
- Spearheaded the development of React.JS components, focusing on Forms, Events, Keys, Router, Animations, and utilizing Redux for state management.
- Customizing existing web pages using WordPress to enhance functionality and user experience.
- Collaborating with release management, executing daily code releases, and performing branch maintenance using SVN for version control.

InfoWay Solutions, India | Sep 2020 - July 2022

Frontend Developer

- Applied best practices in HTML and CSS to create a static site based on the design of a static image, ensuring design fidelity.
- Utilized React.js to enhance rendering performance and employed Node.js for robust server-side applications.
- Developed code for efficient data retrieval from the back end, implementing AJAX and JSON for seamless UI population.
- Integrated existing WordPress plugins and crafted custom themes, plugins, functions, and hooks to enhance website capabilities.
- Implemented Git as a version control tool for developers, facilitating efficient code commit and check processes.
